AbbVie's Commitment to Equality

AbbVie is committed to equity, equality, diversity, and inclusion (EED&I). It's fundamental to who we are and it's just how we "do good business". This includes valuing diverse perspectives, creating an inclusive culture and treating all employees with dignity and respect.

At AbbVie, having a diverse and inclusive culture is a business imperative. We are committed to operating with integrity, driving innovation, transforming lives, serving our community, and embracing diversity and inclusion. It is not only the right thing to do, it strengthens our ability to innovate and is crucial to our ability to deliver now and into the future.

Developing and bringing innovative, life-changing medicines to patients requires diversity of thought – and diversity of thought comes from a diverse workforce. Additionally important, we serve a wide variety of patient populations around the world, and it is crucial that as a company, we reflect them and represent their voices.
