RE: Belmont University College of Pharmacy Post-Graduate Fellowship Programs

Dear Dean,

Belmont University College of Pharmacy would like to inform you and your students of our post-graduate drug information fellowship opportunities to begin in June 2021.

We currently have two fellowships in partnership with local healthcare corporations, Aegis Sciences Corporation and HealthTrust. The programs focus on drug information with additional emphases on academia at Belmont, toxicology at Aegis, and corporate management at HealthTrust. Upon graduation, the fellows are uniquely positioned to obtain employment in an academic, corporate, or managed care role with the comprehensive drug information skills so desired in all pharmacists today.

We ask for your assistance in identifying qualified PharmD students who might be interested in pursuing advanced training in academic and corporate environments. Informational handouts for interested candidates are available on our fellowships' web page at <http://www.belmont.edu/pharmacy/academics/fellowships.html>. Please share these with your students and faculty.

Interested students are welcome to directly contact our current fellows, Drs. Chelsea Deans ([clinicalpharmaegisfellows@gmail.com](mailto:clinicalpharmaegisfellows@gmail.com)) and Sally Hughes ([healthtrustfellows@gmail.com](mailto:healthtrustfellows@gmail.com)), for specific questions and further information.

Thank you in advance for your assistance. Also, if you send your graduate and fellowship program director contact information we would be pleased to help with your graduate and fellowship recruitment efforts.

Sincerely,

**Genevieve Lynn (Ness) Engle, PharmD**

Director, Christy Houston Foundation Drug Information Center  
Associate Professor of Pharmaceutical, Social and Administrative Sciences
